Princeton, NJ | <https://crowbell.design> | todd@crowbell.design | 609-613-6767

Leadership & Collaboration: Cross-functional stakeholder management, Agile product management (sprint planning, backlog prioritization), change management and end-user training, technical-to-business translation, team mentorship and development

Strategic Thinking: Product roadmap development, platform requirements gathering, build-versus-buy decision support, migration strategy and execution, systems analysis and process optimization

Communication: Executive presentation development, technical documentation, data storytelling and visualization, vendor partnership management, facilitating alignment across technical and non-technical audiences

Marketing Technology Platforms: Journey orchestration and workflow design (Iterable, MessageGears - equivalent to Adobe Journey Optimizer/Message Center), marketing automation (HubSpot, Salesforce Marketing Cloud ecosystem), personalization tools (Moveable Ink), content management systems

Analytics & Data: SQL (JOINS, aggregations, audience segmentation), A/B testing and experimentation frameworks, performance metrics analysis, data visualization (Tableau, Excel), campaign optimization and ROI measurement

Technical Foundation: Understanding of databases and data flows, API integrations, privacy and compliance protocols (PII security, data governance), HTML/CSS/scripting for marketing automation

CMS Marketing Specialist/Developer with 10+ years of specialized experience in full-lifecycle strategic email engineering. Proven expertise in building scalable email template systems, managing complex marketing automation workflows, and optimizing campaign performance through data-driven segmentation and testing. Strong background in HTML/CSS development with script-based customization capabilities and advanced SQL skills for audience targeting and reporting.

Rakuten Rewards & ShopStyle (Rakuten subsidiary), San Mateo, CA

Frontend Email Developer, 03/2022 - 01/2025

Build & Integrate

- **Led ESP migration strategy and execution** from MessageGears to Iterable across two business units, conducting comprehensive discovery including stakeholder interviews with marketing and platform engineering teams, vendor consultation, campaign inventory analysis, and technical requirements gathering to build migration roadmap and timeline that delivered on schedule
- Architected composable email template systems using HTML, CSS, FreeMarker, and Handlebars with dynamic personalization logic, reducing new template development time from 3 days to 1 day and supporting scalable campaign deployment across multiple Rakuten International properties
- Delivered template portfolio rebuilds on deadline: completed 20-template reskinning project for

ShopStyle and 10-template rebrand for Collective Voice, implementing component-based architecture for rapid iteration

- Engineered marketing automation workflows and journey orchestrations in Iterable and MessageGears, designing trigger-based campaigns and optimizing deployment processes that reduced redundant campaigns by 30%
- Built and maintained internal CMS features, email templates rendering complex XML/JSON audience data, advanced click tracking systems, and site search in email footer prototype

Collaborate & Govern

- **Managed cross-functional stakeholder alignment** serving as technical liaison between marketing, product management, and platform engineering teams via Jira, Monday.com, and Slack; bridged communication gaps by providing data analysis, visualization, and technical context to support marketing leadership presentations to product directors
- **Established governance frameworks and documentation standards** adopted organization-wide: created comprehensive Confluence documentation for QA processes (advanced Litmus workflows), template development standards, automation workflows, and compliance procedures; developed training materials and delivered webinars on email design, accessibility, and accommodations
- Planned sprints and managed backlog for ShopStyle email program as de-facto front-end email lead within platform team's Agile sprints; built triage document organizing existing ticket backlog with research notes, recommended next steps, and cross-team dependencies to provide program visibility
- Collaborated with senior data analyst on customer lifetime value analysis and co-authored 50-page "State of the Email Program" presentation for marketing leadership, providing all campaign analytics and performance insights

Deliver & Optimize

- **Coded analytics framework** tracking 17 triggered campaigns monthly across 6 KPIs, conducting comparative analysis identifying high-performing campaigns (revenue per send: \$0.81 vs. \$0.03) and longitudinal trend analysis to inform strategic prioritization during IP warmup
- Modified SQL queries (JOINS, aggregations) for audience segmentation based on user behavior, eligibility criteria, and program status while maintaining PII security protocols and data privacy compliance
- Executed data-driven campaign optimization through A/B testing frameworks (6 variants, 30% sample size, statistical significance methodology) and multi-variant experiments testing frequency optimization and dynamic personalization
- Delivered webinars, in-person training: design considerations for email, accessibility & accommodations for corporate communications
- Provided production support and technical troubleshooting for marketing tools including Moveable Ink, Tableau, CMS platforms, and trigger-generating applications, ensuring consistent campaign delivery and performance optimization

Crowbell Design, Hopewell, NJ

Freelance Web Developer, 01/2014 - 10/2025

- Built responsive HTML email templates using Litmus and Email On Acid for QA, maintaining email deliverability standards and cross-client compatibility across campaigns in NetCommunity and Luminare CMS platforms

- Developed landing pages, web pages, SMS campaign templates, javascript apps, documentation, manuals, and multi-channel marketing deliverables for a diverse range of clients
- Coordinated technical aspects of startup's ProductHunt launch campaign, achieving 545% traffic increase for VoxSnap's AudioHub products

Activate Masterclass Workshop Certification Exam, Iterable

Iterable Foundations Certified, Iterable

Email Automations Certification, Intuit Mailchimp

BA, History, University of Pittsburgh, 2009

UX / Project Management Certificate, Startup Institute, 2014
